Changes in PMS reporting quality

- Enhanced common understanding of key stakeholders about project/interventions and PMS at initial stage
- Increased two-way communication between the staff and the communities
Increased community level capacity to assess the real scenario of the project/institution

- For example
  - 71.82% community people reported that tutor attend in CCL timely.
  - 72% group members reported that their income increased directly as a result of DFED support.

- Promoted empowerment and self confidence of the project participants through PMS
  - For example
    - 62% targeted women who selling their Ag. Products through market linkage.
    - Through group initiatives, Community clinic staff are more positive towards service recipient.

Improved data recording and supporting document preservation.

Creating an enabling environment to measure the success and areas need to develop, as a result continuously improve the performance and achieving better results in line with log frame.

- Improved data recording and supporting document preservation.

Data quality (validity, reliability and integrity);
Participation of relevant stakeholders;
Experience and learning sharing at all levels;
Feedback flow;
Use PMS data for learning and take decision.

Data Quality Assurance (DQA) mechanism need to be developed and established;
Different level stockholder’s functionality in PMS need to be ensured;
Feedback mechanisms need to be further strengthened;
Utilization of PMS findings need to be enhanced;
Capacity Building on PMS regularly;
Annually learning sharing event need to be organized on PMS.

- Participatory monitoring guideline need to be revised/updated focusing technology as well as global trend;
- Monitoring Unit need to be renamed as M&E unit and accordingly terming PMS as PM&E;
- Efficient and useful collaboration channels need to be established among SMT, project managers, institution personnel and monitoring personnel;
- Sufficient resources need to be allocated for monitoring purpose;
- PMS need to be expanded in remaining institutions.

Some practices need to be developed to reach expected level

- Operational level:
  - Data Quality Assurance (DQA) mechanism need to be developed and established;
  - Different level stockholder’s functionality in PMS need to be ensured;
  - Feedback mechanisms need to be further strengthened;
  - Utilization of PMS findings need to be enhanced;
  - Capacity Building on PMS regularly;
  - Annually learning sharing event need to be organized on PMS.

- Recommendations for Improving PMS
  - Management level:
    - Participatory monitoring guideline need to be revised/updated focusing technology as well as global trend;
    - Monitoring Unit need to be renamed as M&E unit and accordingly terming PMS as PM&E;
    - Efficient and useful collaboration channels need to be established among SMT, project managers, institution personnel and monitoring personnel;
    - Sufficient resources need to be allocated for monitoring purpose;
    - PMS need to be expanded in remaining institutions.

- Thanks
