Learnings

- Champion in managing massive influx of Rohingya's in Cox's Bazar DAM is a part of that;
- Developed protection framework through project implementation process;
- Improved the quality of teaching and learning for refugee children and youth, aligned with Government Education standards;
- Increased professional development opportunities in different sectors of DAM;
- Improved mobilizing capacity of DAM to deal with many external stakes;
- Rapport building is the key of coordination and practicing accountability issues to address the complex humanitarian crisis.

Challenges:

- To work in the complex situation of Government regulatory mechanism;
- Increased tension between the host communities and the Rohingya population due to ratio;
- Having unavailability of residential facility of humanitarian staff and safety security issues in the Camp;
- Provide specialized mental health and psychosocial support for Rohingya's;
- Ensuring equal gender representation in decision-making process;
- Increasing trend of women and child trafficking, spreading threat of drug and terrorism;
