Community Resilience Planning for Urban Projects: Peer-to- Peer Learning Workshop

ADB, Manila , Philippine
10-11 October 2022

- This workshop aims to answer the following questions:
- What have you learned in implementing your community-led project?
 - What were some of the challenges your team encountered in implementing your community-led project and how did you overcome these challenges?
 - What has changed in your community because of the CLPs/SP3?

Dhaka Ahsania Mission

Faridpur Community Led Project

Faridpur Municipality is one of the oldest and largest municipality of Bangladesh established in 1869. This Category A municipality consists of a total of 27 wards. The municipality is governed by 1 municipal mayor, 27 ward councilors and 9 reserved women councilors elected by direct vote of the people.

MOU Signing Ceremony

Faridpur Community Led Project

A Community Stakeholder Group (CVOG) has been formed with the people of different classes, professions and age groups of the old Ward No. 9, now Wards 17, 18, and 19 of Faridpur Municipality. This Community Stakeholder Group (CVOG) identified their issues and prioritized their project's 3 components.

Component 1: Community-Based Waste Collection System with Capacity Development and Awareness Raising

Component 2: Faridpur Skills and Livelihoods Resource Center

Component 3: Faridpur Climate Resilient Park
The community itself designed, procured and implemented the project.

Faridpur Community Led Project

Issues from the community in Faridpur Municipality for waste collection. The waste has to be carried to the collection point for collection of the waste.

The community has a need for a park. The park is a place where the community can spend their leisure time and play with their children.

Faridpur Community Led Project

Amitab Bose
Faridpur Municipality

"I have said that if the quality of products made to know the waste material and will improve living from the Faridpur Municipality. The only waste, all required material will be provided by the municipality. The park is being constructed as to provide needed things of all ages can be able to learn about climate change."

Faridpur Community Led Project

Md. Shamul Alam
Faridpur Municipality

"People wanted the park. It will be a place where the community can spend their leisure time and play with their children. The park is a place where the community can spend their leisure time and play with their children. The park is a place where the community can spend their leisure time and play with their children."
